

ART-Dashboard For Reliability Control Program

www.art-dashboard.com
contact@art-dashboard.com

Because everyone shall have access to business intelligence and data science techniques to support an effective Reliability Control Program.

ART-Dashboard supports all the steps of an efficient Reliability Control Program: data collection, data analysis, data reporting.

All standard metrics included:

- Dispatch reliability,
- Mechanical reliability,
- Pirep/Marep rates,
- MTBUR, Rogue unit detection,
- MEL statistics
- Upper control limits
- And many more ...

AR.Technology

Creating software in an art

Benefits

Implementation of an efficient RCP is key to optimize costs

Cost

Time

Reduced time needed to perform all RCP activities

Reduce process variability, capture knowledge

Quality

Our offer

More than just a software, we can provide the full range of services:

Starter		Power			Premium
Reliability Training *	ART-Dashboard for RCP **	Reliability Training *	Reliability Training *	Reliability Training *	Full externalisation *
		ART-Dashboard for RCP **	ART-Dashboard for RCP **	ART-Dashboard for RCP **	
			RCP template creation *	RCP template creation *	
				Coaching *
